### EDUCATION

#### Software Engineering

General Assembly  
2020

#### Fleming College

Culinary Management  
2010 - 2012

---

### SKILLS

JavaScript

HTML

CSS

NodeJs

MongoDB

Python

### ABOUT

I am a meticulous, driven, and a creative thinker who has worked professionally in both team and independent settings for the last ten years. I am a recent General Assembly graduate from the Software Engineering Immersive program. This has given me the knowledge to be proficient in JavaScript, HTML and CSS. I am searching for long term employment in an environment where I can continue to strengthen my skill set as a software developer.

### PROJECT SHOWCASE

#### [Code\(Save\)](#)

Full Stack Application

A full stack application that allows users to login in with their Google account which gives them access to their own database to store their code "snippets" or "blocks". The application uses NodeJs and Express for a front end framework and uses MongoDB to handle the backend.

- The app is able to create, update, read, and delete user's documents (CRUD)
  - The app utilizes Google Auth for security.
  - Utilizes the Bulma CSS Framework
- 

### WORK EXPERIENCE

#### Kitchen Manager

The Vic | 2019 - 2020

In my most senior role in the culinary industry I assisted a restaurateur successfully realize their expansion project. As the Kitchen Manager opening an entirely new kitchen I assembled the team, employee schedules, and devised the company's training program, and constructed a concise and creative menu. With a strong focus on efficiency, communication, and team building I facilitated the development of a workplace that was both positive, effective and successful. In the first 6 months we were able to exceed our target sales by more than 20%.
