MongoDB

Python

ABOUT

I am a recent General Assembly graduate from their Software Engineering Immersive program. I am a passionate and enthusiastic person, who has worked in both team and individual environments for the last ten years. I am proficient in JavaScript, HTML and CSS. I am searching for a new challenge in an environment where I can grow.

PROJECT SHOWCASE

[Code\(Save\)](#)

Full Stack Application

A full stack application that allows users to login in with their Google account which gives them access to their own database to store their code "snippets" or "blocks". It uses NodeJs and Express for a front end framework and uses MongoDB to handle the backend.

- The app is able to create, update, read, and delete users documents(CRUD)
 - The app utilizes Google Auth for security.
 - Utilizes the Bulma CSS Framework
-

WORK EXPERIENCE

Kitchen Manager

The Vic | 2019 - 2020

I helped build a team from the ground up when I was given the opportunity to help run the team on an expansion move. I scheduled employees and was in charge of the company's training program. Utilizing my time management and team building skills, I made a work environment that was both positive and effective. In the first 6 months we were able to hit our sales target that exceeded more than 20%.
